

Builder Liaison Program

Getting ready to build a new home or renovate your existing home?

Out-of-Sight will work with you and your builder to ensure that your home is ready to work for you!!

Out-of-Sight will use our standard design process to work with you to determine the technology features that best meet the needs of you and your family. We will look at everything from basic infrastructure to entertainment to productivity to security.

We will work with your builder to ensure that your desired features are properly installed and ready for your use. We can either work with your builder to supervise the installation or we can use our own technicians to perform the installation. We have good relationships within the builder community and our diligent project management ensures that we do not slow or delay the overall project.

Options
