

Custom Technology Option

The Out-of-Sight Custom Technology Option is designed to provide the entire technology infrastructure required for an estate. It offers many high end features and room for expansion to easily add home networking, satellite and surveillance services. **All cable runs are fully tested and certified** so that you can be certain that there are no future issues.

The package provides the following benefits:

- Phone and Cable distribution
 - Supports 4 incoming phone lines
 - Supports up to 8 phone extensions (expandable to 32)
 - Supports 8 video jacks with amplified video signal
 - Supports distribution of internally generated signals
 - Supports external antennae
- Twelve runs of 2 CAT6 and 2 RG6
- One run of 2 CAT6 and 2 RG6 to service inputs for external phone, data and video
- Two large structured wiring cabinets with power distribution
- Network ready cabinet
- Supports the addition of a satellite switch
- All structure jacks and cable terminations are included
- A complete technology and cable certification turnover package is provided to both the builder and the home owner

Typical Layout

- 5 Bedrooms
- 2 Home Office
- 2 Family Rooms / Kids Play Room
- 1 Home Theater
- 1 Kitchen
- 1 Den

We will work directly with the home owner if they wish to upgrade or modify any of the package features. Our Service Technicians will take care of all of the installation, testing, training and documentation. We use only top quality products from vendors such as Home Director, Genesis, Leviton, OnQ and GE. Out-of-Sight will also handle any post turn over issues or support requests directly with the customer.

We will work to your schedule to ensure that there are no delays.

Call for more information about the program and for detailed pricing.
