

Foundation Technology Option

The Out-of-Sight Foundation Technology Option is designed to provide a solid foundation for home technology at a reasonable price. It offers the perfect starter package for providing the basics of structured wiring and home technology. **All cable runs are fully tested and certified** so that you can be certain that there are no future issues.

The package provides the following benefits:

- Phone and Cable distribution
 - Supports 4 incoming phone lines
 - Supports up to 8 phone extensions (expandable to 32)
 - Supports 8 video jacks
- Three runs of 2 CAT5e and 2 RG6
- One run of 2 CAT5e and 2 RG6 to service inputs for external phone, data and video
- Standard structured wiring cabinet

All structure jacks and cable terminations are included

- All cable is tested and certified using a Fluke Networks meter
- A complete technology and cable certification turnover package is provided to both the builder and the home owner

Typical Layout

- 1 Bedroom
- 1 Family Room
- 1 Home Office

We will work directly with the home owner if they wish to upgrade or modify any of the package features. Our Service Technicians will take care of all of the installation, testing, training and documentation. We use only top quality products from vendors such as Home Director, Genesis, Leviton, OnQ and GE. Out-of-Sight will also handle any post turn over issues or support requests directly with the customer.

We will work to your schedule to ensure that there are no delays.

Call for more information about the program and for detailed pricing.
